

How to use Solar power plant production management strategy?

Original text as published before the redesign of this article. Wording unchanged.

Archived: 28 October 2026

Solar power plant production management enables us to regulate our Solar power plant according to our needs.

1. step: Select strategy Solar power plant production management when adding a new strategy
2. step: Select which devices you would like to regulate
3. step: Select which devices you would like to measure
4. step: Define goals; for example, write how much energy you can send to the grid.

Do you want to delay the power decrease? Enable this option and write the value in seconds to delay export power decrease for solar power plants.

How much energy you can send to grid?	Yes ☒	14	kW
Do you want to delay power decrease?	Yes ☒	10	sec
