

Specific configuration for type Battery in Reduxi Configurator

Original text as published before the redesign of this article. Wording unchanged.

Archived: 28 October 2026

Category	Battery
Location	Location defines the role and position of the battery.
Location – Main	The battery could play a main role, for example, the weekend house does not have access to the electrical grid and we use the battery as the main meter (role)
Location – Other meter and devices	The battery is used to support the car or other devices within the object. The battery is placed within the house
Location - None	In case we would have an edge case, otherwise, battery normally plays the main or sub role.
Energy direction	Defines the type of energy direction.
Energy direction – Consumption	In case we would have an edge case, otherwise, the battery always has Consumption & Production selected.
Energy direction – Production	In case we would have an edge case, otherwise, the battery always has Consumption & Production selected.
Energy direction – Consumption & Production	Normally we always charge and discharge the battery.
Energy direction – None	The battery does not use any energy direction.
