Category	We choose categories based on what we measure - we can choose any category, for example, we can have a main meter which normally belongs to Other category. However, in our example, a meter is used to measure the car chargers, so we select the car category. This meter will be shown as a car charger icon in the application as it represents the car-charged data.
Location	Location defines the position or role of the meter.
Location – Main meter	Main meter.
Location – Other meter and devices	Secondary meter or countdown meter within one area of the grid.
Location - None	In case we have an edge case, otherwise, the meter normally has a main or sub role.
Energy direction	Defines which type of energy meter measures.
Energy direction – Consumption	Measure consumption.
Energy direction – Production	Measure production.
Energy direction – Consumption & Production	Measure consumption and production.
Energy direction – None	The device does not measure any energy type.
