

# Manual software update of Reduxi Controller

Original text as published before the redesign of this article. Wording unchanged.

Archived: 28 October 2026

When automatic update of Reduxi Controller is not possible (e.g. due to the lack of internet connection, closed ports, etc.) we can manually install a patch.

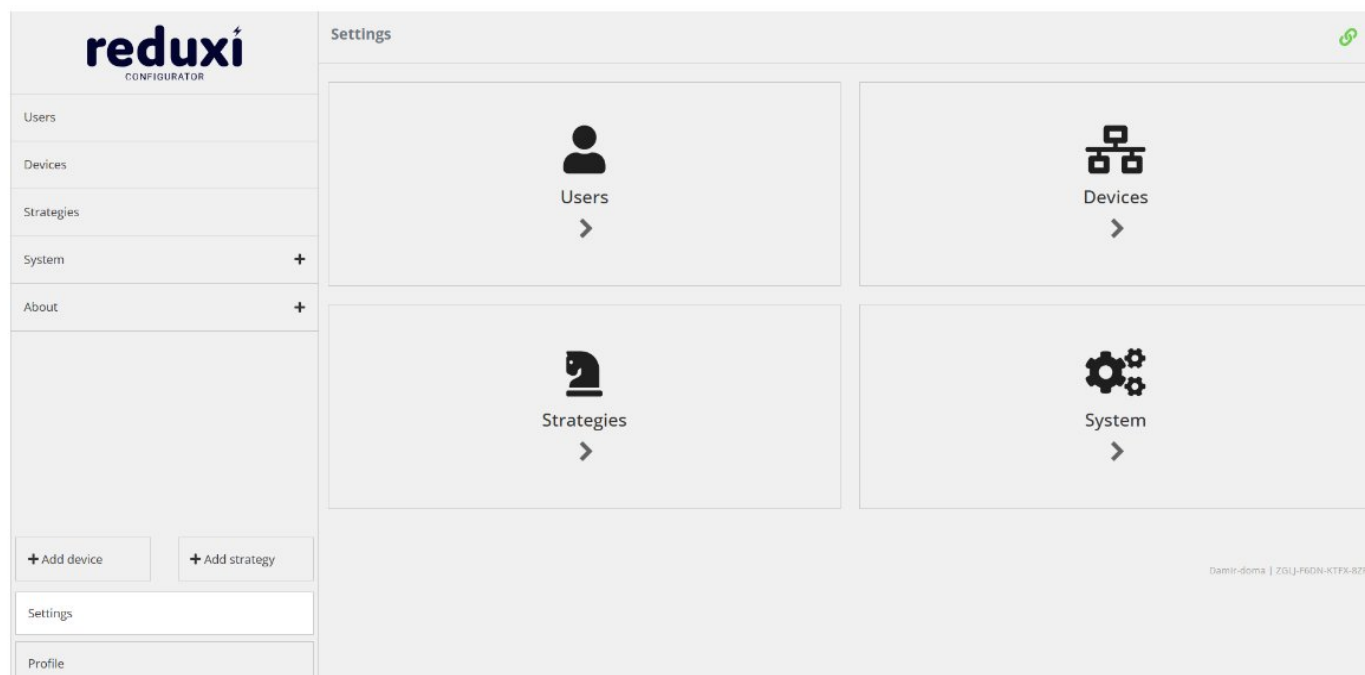

## How do you make an update?

1. Log in locally to the controller through the local network (wifi or wired)
2. Open your browser and open <http://reduxi.local>
3. Log in with the administrator username and password. Usually, that is :

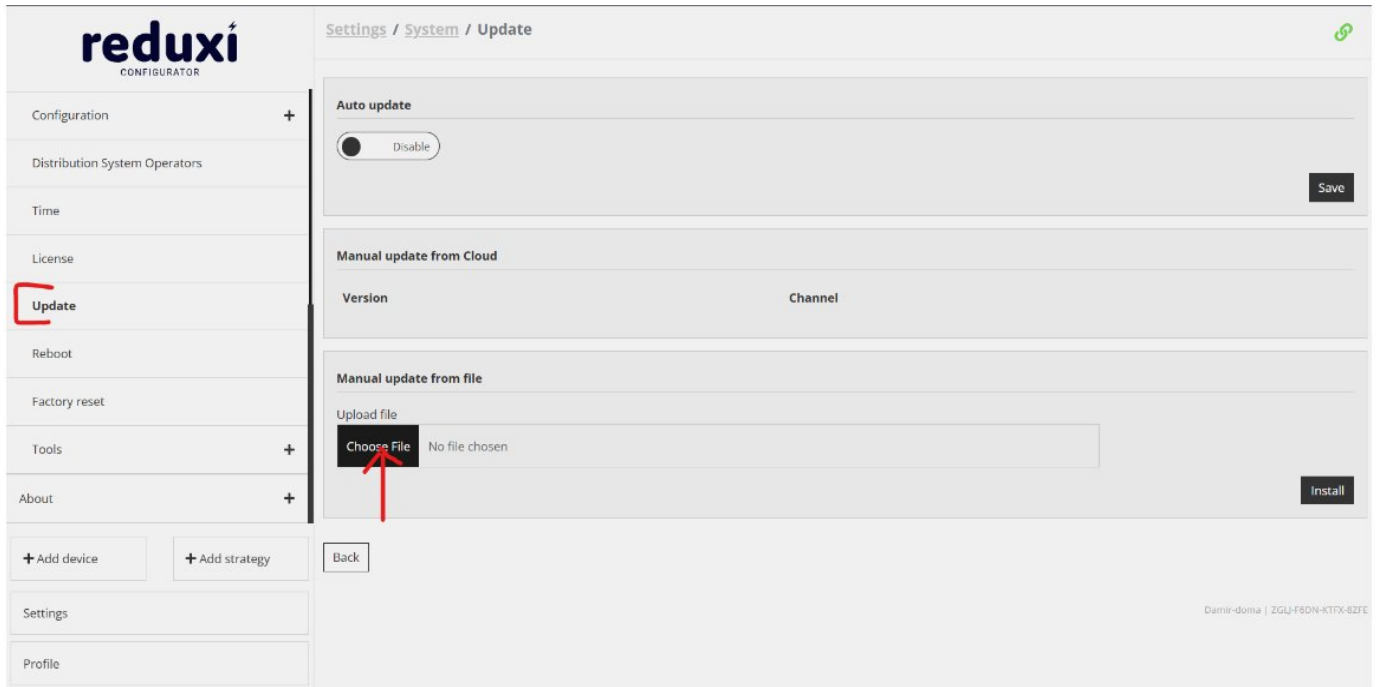

U: admin

P: admin

4. Select "Settings" and then "System"

5. Select "Update", "Manual update" and then upload the file we have provided to you and click "Install"

6. After 2 minutes the installation will be complete
